I've been (I still do) working with several technologies through my 6+ years of experience and continue learning the newest ones in order to offer the best solution for the problems/ideas of the people. That's one of the things that I really enjoy... to transform those ideas into a real sensation through the web and mobile development.

WORK EXPERIENCE

- 2012 - Ongoing**
 - FULL-STACK WEB AND MOBILE DEVELOPER** at Home Morelos, Mexico
 - Working for clients/companies from home.
 - Markup (HTML, Jade/Pug, CSS, Stylus, Sass, Webpack)
 - Animations (GSAP, Scrollmagic, Keyframes)
 - Front end (VueJS, ReactJS + Redux)
 - Back end (Laravel, NodeJS, ExpressJS, Go)
 - DB (MongoDB, MySQL)
- 2017 - 2018**
 - LEAD FULL-STACK WEB AND MOBILE DEVELOPER** at Laudrive (Mexican company) - laudrive.com Morelos, Mexico
 - Mobile application that offers a private car service driven by woman used for woman only.
 - I was working with: Ionic 2, Angular 2, React Native, NodeJS, Firebase, Google Maps APIs among others in order to have the mobile apps working and also the internal operations.
- 2016 - 2017**
 - FRONT-END AND MAIN MOBILE DEVELOPER** at PaloIT (French company) - palo-it.com Mexico city
 - Mobile application that control your fleet's fuel consumption.
 - I worked with Ionic 2 / Angular 2 for Android and iOS platforms.
 - Using the following Google APIs of Maps: Directions, Geocoding, Distance Matrix, Geolocation and Static Maps also cordova plugins.
 - And I built: all the functionality and the markup of the mobile app like the driver management, perform searches of places and directions with details, planing routes using multiples stops and a little gps navigator.
- 2016**
 - FRONT-END DEVELOPER** at Trato (Mexican company) - trato.io Mexico city
 - Web app to manage contracts in the cloud.
 - I worked with Angular 1 / Angular 2.
 - I built the first version of this app which included the way to create contracts with dynamic sections and the process between the sender and the receiver also in the first days I started working with Go/BeeGo to create some first services for the backend.
- 2014 - 2015**
 - FULL-STACK WEB DEVELOPER** at Apps-O-Rama (Ukrainian company) - appsorama.com Mexico city
 - I built/upgrade several websites using only HTML5/CSS3 and jQuery to perform the animations and one API using Laravel 5 for an iOS application.
 - Two websites for two mobile games.
 - The API was built for the UbiQ iOS application using some Amazon services for the backend like S3 and EC2 instances.
- 2013**
 - WEB AND MOBILE DEVELOPER** at Softtek (Mexican company) - softtek.com Aguascalientes, Mexico
 - I worked mostly using Phonegap for iOS and Android and also a tester of desktop apps and just a
- 2013**
 - PHP DEVELOPER** at CodeJobs (Mexican company) - codejobs.com Morelos, Mexico
 - I used the PHP framework built by the CEO of this company to work on the main website.
